Application/Control Number: 10/559,720 Page 2

Art Unit: 1793

Applicants' Preliminary Amendment, filed on December 5, 2005, has been made of record and entered. In this amendment, claims 24-41 have been canceled, and new claims 42-64 have been added.

Claims 1-23 and 42-64 are now pending in this application.

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9, 14, 17-23, and 42-64 are rejected under 35 U.S.C. 102(b) as being anticipated by European Patent No. 0 164 200 (hereinafter "the European Patent").

The European Patent teaches a platinum based amorphous metal alloy oxygen anode having the formula

wherein Pt is platinum, A can be, inter alia, W, Ti, and mixtures thereof, and D is B, C, Si, Al, Ge, P, As, Sb, Sn, and mixture thereof, "p" ranges from about 40 to 92, "a" ranges from about 0 to 40, and "d" ranges from about 8 to 60, with proviso that p + a + d = 10. See the Abstract of the European Patent, as well as page 5, lines 8-22.

Application/Control Number: 10/559,720

Art Unit: 1793

Page 3

The atomic values for Pt and A read upon Applicants' claims 1-9, 14, 17-22, and 42-47, 49-54, 56-58, and 60-63.

Regarding claims 23, 48, 55, 59, and 64, the European Patent teaches that the amorphous metal alloys, which can be either solid, powder, or thin film form, are "particularly suitable as coatings on substrate metals which are then employed as oxygen anodes in various electrochemical processes." See page 7, lines 3-5, 13-15, and 21-26 of the European Patent, the latter of which discloses exemplary substrate metals and non-metals, and further disclose that the substrate may be a semi-conductor material (considered to read upon the limitation "electrically conductive support", given that Applicants' claims do not define or exemplify said support).

In view of these teachings, the European Patent anticipates claims 1-9, 14, 17-23, and 42-64.

## Allowable Subject Matter

3. Claims 10-13, 15, and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Application/Control Number: 10/559,720

Art Unit: 1793

Although the European Patent teaches alloy compositions comprising platinum, titanium, and tungsten, this reference does not teach or suggest the limitations of claims 10-13, 15, and 16, regarding the respective atomic percentages of these elements.

Page 4

## Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PATRICIA L. HAILEY whose telephone number is (571)272-1369. The examiner can normally be reached on Mondays-Fridays, from 7:00 a.m. to 3:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo, can be reached on (571) 272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group 1700 Receptionist, whose telephone number is (571) 272-1700.
